Commercial clients are moving FX business to larger banks. High-net-worth customers wire internationally every week. Most community and regional banks still don't have a competitive answer. Finzly FX delivers the full product depth of a money-center bank, integrating with the core and digital banking platforms you already run.

## THE REVENUE OPPORTUNITY

### Treasury & corporate clients

Your commercial clients need FX forwards, hedging, and multicurrency accounts to run international operations. Right now they're getting it from the large banks. Finzly lets you offer more - and most importantly, you retain FX revenue in-house.

### Correspondent banking revenue

Finzly-powered banks offer correspondent FX services to smaller institutions - creating a new fee-based revenue stream. Respondent banks get a world-class experience at par with, or better than, the largest banks.

Banks face a growing retention problem: commercial companies and HNW customers whose FX needs are increasing are quietly moving to larger institutions. **The right platform prevents that exodus - and turns international banking into a recurring revenue engine.**

Finzly's FX STAR is easy to learn and stands out in customer experience. We are now able to deliver a client interface that is at par or superior than larger banks. Our clients can get FX quote anytime and enjoy a great experience. ”

*What your clients see*

## Customer experience layer

- White-label corporate portal for managing payments, hedging, and multi-currency accounts - two-factor auth and multi-level approval workflows
- Multi-currency accounts: hold, receive, and pay in foreign currencies without forced conversion - ideal for importers, exporters, and globally-mobile clients
- Branch portal for tellers offering real-time exchange rates, balance checks, wire initiation and compliance controls for front-line staff

Corporate portal

Branch portal

MCAs

*Pricing, trading & risk management*

## Front office

- Live pricing engine streams tradeable rates via FIX, REST, and custom APIs - multi-level tiers by channel, customer class, and deal size
- Auto-cover trader: automatically hedges positions via back-to-back trades or predefined tolerance settings - no manual intervention required
- Trader desktop with real-time position blotters, slice-and-dice risk views, and drag-and-drop P&L reporting across 40+ fields
- Connect to multiple liquidity providers; auto-layoff risk on custom rules; circuit breakers for volatile currencies or time zones

Pricing engine

Liquidity mgmt

*Post-trade, compliance & settlement*

## Back office

- Custom post-trade workflows for confirmation, settlement, posting, and reporting - maker/checker security at every step
- MT SWIFT messaging, ISO 20022 native, and seamless SWIFT MX transition without re-implementation
- Daily MTM revaluation, DTCC reporting for options, Dodd-Frank / CFTC compliance, and pre/post-trade disclosures - embedded, not bolted on
- Complete audit trail at every step; automated journal entries and EOD processes; proactive error alerts and limit monitoring

Get the FX capabilities your bank needs today - with a flexible approach that fits your current infrastructure and growth goals. Start where it matters now, while building toward a fully modern, scalable FX ecosystem for the future.

PHASE 1 · CORRESPONDENT

**Start with international payments**

Partner with a Finzly-powered correspondent bank to offer branded FX payments immediately - a white-label portal, live rates, and full compliance live in months, with no trading desk or FX infrastructure to build.

Branded portal in months · No trading desk needed

PHASE 2 · HYBRID

**Open corridors where it matters**

Open foreign currency accounts for your highest-traffic corridors - Canada, Mexico, Euro-zone - and keep correspondent banking for the rest. Add hedging, forwards, and MCAs as your corporate clients demand them.

Right-sized infrastructure · Flexible per-currency coverage · Pay for what you use

PHASE 3 · FULL SUITE

**Own the full FX relationship**

Run the complete FX book in-house: spot, forwards, window forwards, swaps, options, and MCAs - on a fully hosted SaaS platform. Capture 100% of the spread and fee revenue your treasury clients generate.

End-to-end SaaS · ISO 20022 native · Full product suite · Compete with money center banks

## ECOSYSTEM & INTEGRATIONS

### Core-agnostic. Already in your stack.

Finzly sits alongside your existing infrastructure - no rip-and-replace. It plugs into the core banking, digital banking, liquidity, and compliance platforms your institution already runs, and is live in just a few months.

# Part of a Complete Modern Operating System for Banks

Finzly BankOS

Account Galaxy

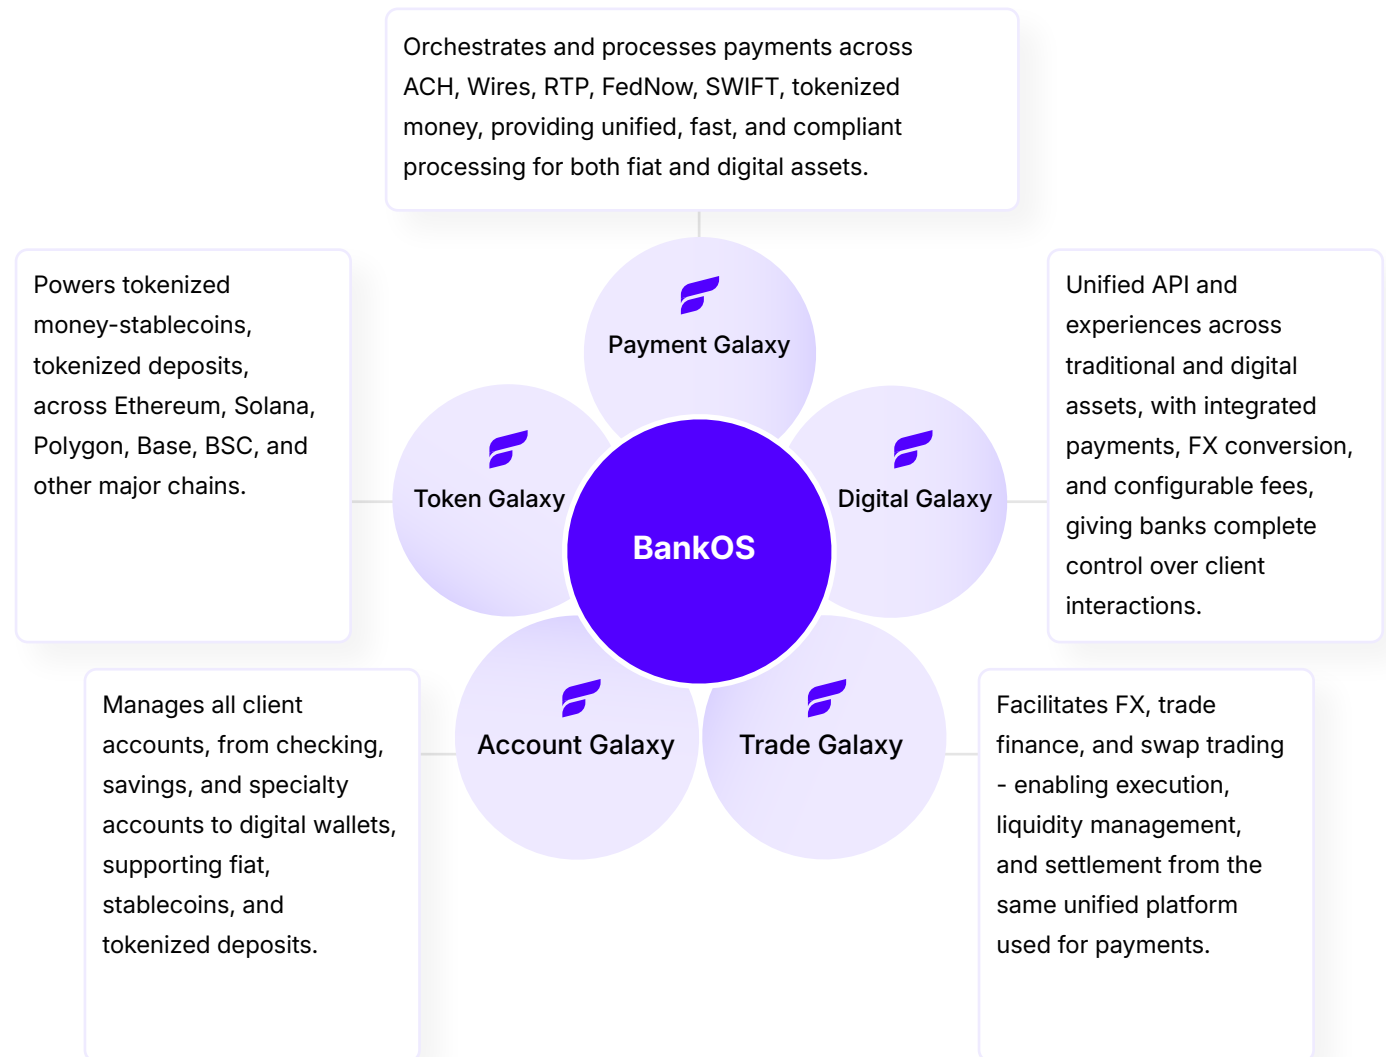

Payment Galaxy

Digital Galaxy

Trade Galaxy

Token Galaxy

FX operates within Finzly's BankOS platform - a modular set of Galaxies designed to support end-to-end corporate banking. Bringing an FX program to life isn't just about pricing and trading. It requires money movement infrastructure that can move money the moment a trade executes - across domestic wires, SWIFT, ACH, RTP, FedNow, and increasingly, tokenized settlement networks.

## ABOUT FINZLY

Finzly is a modern operating system that serves as the innovation core for banks, free from legacy core dependencies. It manages traditional and tokenized money and their movement on a single platform, with advanced payment processing and a unified ledger, enabling new growth channels from embedded banking, FX trading, and payments.
